

News from the Stars:

EPHEMERIS

For the Year 1680.

With *Astrological Judgments* upon the  
Several *Eclipses, Positions, and Configurations*  
of Heaven happening therein.

Being the *Bisextile* or Leap-year:  
And from the CREATION of the  
WORLD, 5629 years.

WHEREIN  
You have a perfect and brief Account of the  
most material Matters and Things in-  
tended by the Heavens to be manifested in  
the WORLD in the same YEAR.

By WILLIAM ANDREW  
Student in Astrology.

*Maxima pars eorum quæ scimus, et minima  
pars eorum quæ nescimus.*

London, Printed by P. Thompson for the  
Company of Stationers.

*Astrologia est pars Uranoscopiæ explicans rationem res futuras ex Astris præcognoscendi, quatenus Astra à Deo sunt condita & posita signa rerum humanarum. Alstedius Method. Admirand. Mathemat. lib. 5. pag. 264.*

# TO THE READER.

**Y**OU have here some Observations upon  
the year 1682. the year it self is Leap-  
year — God Almighty grant it may be a year  
of Peace and Tranquility unto all Christen-  
dom.

There doth happen in this year some very  
considerable Configurations of Heaven, which  
if they be of a propitious Nature unto Man-  
kind, it will be well, —

*Astra agunt, non cogunt.*

The Stars have great Influence upon Humane  
Affairs, as many Wise men conceive; but God  
rules the Stars, and disposeth of all Things as  
he pleaseth. — God preserve England, Scot-  
land, and Ireland, in peace and unity; that  
we may all live in the fear of God, in humble  
Obedience to the King, and Brotherly Charity  
one to another. Amen.

Radwinter, near  
Saffron-Walden  
in Essex.

William Andrews.

9	Cycle of the Sun.	9
⑦ ⑧	Dominical Letters.	⑥ f
3	Roman Indiction.	3
9	Epact.	29
21	Number of Direction.	24

## *The use of the Two ensuing Tide-Tables.*

**T**O find the time of Full Sea, or High-water in any of those places mentioned in the two ensuing Tide-Tables, you must observe, First the Age of the Moon, which you may easily find in the next following Table, wherein you have the Moons Age every day throughout this year 1680. And having therein found out the Moons Age, according to the directions mentioned for that purpose, in the side of the said Tables. Then have recourse unto the said Tide-Tables, and look for the place desired, in the Head of the said Tables, with the Age of the Moon, in the Column under the Title of *The Moons Age*, and in the common Angle, or meeting of the Lines, in the Column under your place, you shall have the time of High-water in Hours and Minutes.

Yet Note, that the Tides do not always fall out exactly at the time found in these Tables, by reason of the difference of the Moons Latitude, high Winds, Land floods, &c. which do very often alter the time; yet this is the exactest Rule that can be given for the finding of them.

A TABLE of the Moons Age every day throughout this year 1680. whereby, with the help of the ensuing Tide-Tables, the time of High-water and full Tide may be found in those places there inserted

**T**He *Configurations of Heaven* at this time, are of Importance: and do foreshew, that Matters and Things, in some parts of the World, now stand in somewhat a dubious posture. In this month the Affairs of some Countries are pretty highly carried on, and some Warlike busineses seem to be in Agitation. — Much News, and many various Reports, touching some Nations Transactions. The Merchant suffers detriment at Sea by high winds, and Ships at Sea are in danger of Shipwrack. *Poland* much hinted at. Sundry Rumours from the *North, North-east, and Western parts, &c.* — *Poland, Russia, Ireland, Tartaria, Moscovia, the Bishop of Munsters Dominions, the Switzers Countries, Sweden,* and sundry other places, now concerned by the significations of the Stars. Notwithstanding the seeming uncertain posture of Affairs in some places, the present condition of some Nations, is better than reported; and the generality of People, seem inclined to Peace and Amity: Though some murmuring, repining, and unquiet Spirits, are labouring otherwise. —

The weather, for the most part, will be sharp, frosty, and windy. Expect a very great wind, in the second week of this month; and snow, or much wet, about the months end.

1680. February hath xxix days.

Full Moon the 4 day, 4 minutes past 2 afternoon.  
 Last quarter the 12 day, 1 minute past 4 afternoon  
 New Moon the 20 day, at 1 in the morning.  
 First quarter the 26 day, 39 mid. past 3 afternoon.

**D**ifficulties attend some People Northward, and North-east from *England*: And a month of much business. Many Treaties on foot: New Leagues at hand. Providence now smiles, on some Countries under *Taurus* and *Pisces*. — Good news from *Ireland*: where things seem to be in a comfortable condition. The *Polander* successful. The *Hollander* busie in his Affairs: Sundry Ships arrive, to the satisfaction and benefit of the Merchant; and good News from Sea. The whole Actions of this month, will be smoothly managed: However, the unruly *Tartar* may prove troublesome to his Neighbours. Some Battel, or Skirmish, wherein the *Muscovite*, *Tartar*, or *Swede*, may be concerned. Many things under Consideration about Sea-affairs, and Naval preparations at hand. News from *Holland* and *Portugal*. *Mars* now passeth out of *Aquarius* into *Pisces*, and *Saturn* becomes direct in Motion. —

The weather will be seasonable most part of this month; and agreeable to this time of the year.

1680.

**P**Eople in some places not satisfied. Rumours of War, or Commotions, in the *Northern* and *Eastern* parts. Controversies in some Countries not far off: and little fidelity amongst some men; being ready to quarrel one with another. Some Nations seem inclined unto War and Contention; and false Reports, and lying Pamphlets are spread abroad, by perverse and unquiet persons, though to their own just detriment. The Stars are not very serenely disposed now, for here is a Quartile of *Sol*, *Mercury*, and *Mars*, with the envious Planet *Saturn*, which are of an unpleasant signification. Besides, in this month, there is a great *Eclipse* of the *Sun* in *Aries*, and though scarce visible in *England*, yet it's worthy of consideration. — Piracies and Storms at Sea, and Robbing at Land. Sea Negotiations much talk'd of. Some Countries are not so well settled, as might be wished: and cross and unruly passages, may attend some place or places, lying towards the before-mentioned parts of the World. A dubious and unsettled Spring draws nigh, not very acceptable to the Farmer.

Much cold and wet weather, very often in this month.

1680.

April hath xxx days.

Full Moon the 3 day, 28 min. past 11 at night.  
 Last quarter the 11 day, 57 min. past midnight.  
 New Moon the 18 day, 20 min. past 6 afternoon.  
 First quarter the 25 day, 28 min. past 1 afternoon.

**M**atters of Consequence now appear in some Countries of *Europe*. An active time. Where Armies are on foot, some considerable Action happens. Sea-men also are employed more than formerly : And some Nations are setting out Fleets to Sea. Leagues formerly made, are not very well kept, but are subject unto Alteration about these times. Some Countries affections, being not very firm unto one another. Some Battel hath either lately happened, or may be feared to be near at hand. Sea-Action betwixt the *Turk* and *Venetian*. Disturbances and Mutinies, in *Constantinople*, and the *Turks* Dominions, &c. That City will be now sensible of some sudden Casualty. Some Countries and Cities seem alarm'd, and the present face of things in some places, look but dubiously. Some rash and unpleasant designs on foot amongst some people. This months effects hath relation unto *Germany*, *Denmark*, *France*, *Sweden*, *England*, *Scotland*, *Venice*, *Holland*, *Zealand*, and *United Provinces*, &c. —

Pretty good weather now and then in this month. Cold and wet weather about the end of Easter week, &c. —

**T**He grand Actions of this Month appear somewhat uncertain, Mens minds are variable and unconstant, and if the present Transactions and Intentions of some Nations and People be now quiet and peaceable, it will be well. The *Configurations* of the Stars are of a pretty mild nature, Here is a *Conjunction* of the *Sun* and *Jupiter*, of *Mercury* and the *Sun*, and of *Venus* and *Mars*.—Some News still abroad of the various concerns of some *Septentrional* Countries, and also of the *Low Countries* affairs. *Ireland*, *Poland*, *Lorrain*, &c. enjoy a moderate time, notwithstanding all fears and various reports, &c. However *Mars* now enters *Taurus*, and it's probable that many material things may in this Month be either acted or under consideration in those Countries; and the publick Designs and Negotiations of divers of those places, mentioned by me in the last Month, seem now earnestly and variously discoursed of.

Moderate weather for The most part of this Month, perhaps Thunder and Lightning about the beginning, middle, and end of the same.

**J**upiter is gone out of *Taurus* and is come into *Gemini*, and there is no less than seven Conjunctions of the Planets now: One of them in *Taurus*, four in *Gemini*, and two in *Cancer*; all of very considerable significations. An eminent City or two in these parts of the World concerned now, likewise *Flanders*, *Brabant*, and *Spanish Netherlands*, where at this time much business is in agitation——Things of Importance debated on, Great Councils and Consultations on foot, Embassadors employed, new Laws, Constitutions, Leagues, and Treaties, &c. are either established or under consideration; Various Actions appear, but of what kind time will best discover.

——Some people are for War others for Peace: However endeavours are promoted to Reconcile differences, and those formerly unquiet appear now peaceably disposed. Matters of consequence *Northward*, are now manifested, and *Holland*, *Zealand*, *Venice*, *Amsterdam*, *Constantinople*, and the *Turks* Dominions also now are concerned. Sudden Fires in some place or places, or damage by Thunder and Lightning. A time of good Trading, the Merchants and Citizens of *London* thrive and prosper: May that City be free from all Distempers and Casualties now and ever.——Tempestuous. Windy, and unconstant Weather often in this Month. violent Storms or much wet in Midsummer Week, and at the Months end.

**T**He present state and Condition of these times is pretty calm and moderate, and the Stars in this Month are in an indifferent serene posture.

— Things formerly consulted of do now shew forth themselves, sundry discourses about Sea Negotiations, Intelligence from the *North* of some unruly passages, the motion of Armies, &c. — Some considerable Ships and Fleets at Sea: Betwixt the *Turk* and *Venetian* something of remark now happens. The *Dutch* are full of business Rumors and Reports from *Scotland*, and sundry other places under *Cancer*. *Mars* now enters that sign, and makes hast to be in *Conjunction* with *Saturn* therein which he accomplisheth the next Month, whose Influence will have much relation unto the Transactions of those places under that *Constellation* both at Sea and Land. Many sober persons are managing their affairs and businesses with much mildness and discretion, whilst some others appear sturdy and rough, &c. —

Unsettled, stormy, and wet weather in the first and second weeks of this Month, the rest of the Month will be seasonable enough, &c. —

1680. August hath xxvi Days.

**H**umane Actions many and of sundry Natures.  
 Mutinies and disturbances in *Constantinople*,  
 something of consequence hath lately happened  
 there, or that City now under many dangers, sub-  
 ject unto some sudden change or great disasters,  
 perhaps prejudiced by Fire.——Mens minds  
 are various, possessed with fears and jealousies.  
 Some people inclined to quarreling, and do busie  
 themselves in Controversies, and would willingly  
 cause Commotions, acting their part with much  
 subtilty and under-hand dealing, by covetous de-  
 signs and self ends.——whilst some persons of  
 more *generous* and *heraick* dispositions are labour-  
 ing with all integrity to put an end to all publick  
 Conteſts and Differences, and to settle Peace and  
 Concord between Nation and Nation, for the ge-  
 neral good and to the content of all honest Hearts.  
 ——The Stars are in a very moderate poſture  
 now, and somewhat a calmer time appears than  
 in some Months paſt——both at Sea and Land,  
 &c.——Seasonable weather all this Month, a great  
 Wind in the second Week thereof, &c.——

OCTOBER'S Observations, 1680.

**A**N indifferent moderate time now,——yet some Nations publick Affairs are not very well settled. Those places under *Cancer* are again concerned, and some debates are not yet fully determined.——Somewhat of Importance appears in the *Emperours* Countries, and also in *Italy*. Plenty of News some true and some false,——Grumbings and Murmurings, a sort of People not satisfied, some *German Prince* or *Princes* discontented,——yet it may be hoped that the general Affairs of *Christendom* meets not with any considerable interruptions now.——People are advised unto moderation, and do not much concern themselves in troublesome Negotiations. The Merchant this Month receiveth some loss at Sea. The Pirates of *Tunis*, *Algier*, &c. are chastised. Some Ships of the *Dutch* in danger, and so are some of the *Venerians*.

Untettled, cold, and windy wet weather very often in this Month, &c. ——

November

1686. November hath xxx Days

Last quarter, the 3 day, 22 minutes past 4 morning.  
 New Moon, the 11 day, 16 minutes past 6 morning.  
 First quarter, the 19 day, 53 min past 6 morning.  
 Full Moon, the 25 day, 23 minutes past 11 at night.

Some very considerable Aspects of the *Celestial* Bodies appear in this Month of *November*, *Venus*, *Mercury*, and the *Sun* oppose *Jupiter*, and *Mars* is in *Quartile* unto him and the *Sun*. Designs and endeavours on foot to cross and impede the Peace and Tranquillity of some Countries and Cities. The Soldier prosecuteth his Business with much vivacity, wheresoever now employed.—— Skirmishes and Conflicts about this time, and Martial Actions and Designs are discoursed of.—— Troubles in *Hungary* if not nearer hand. The publick Affairs of some Countries and Cities seem somewhat unsettled. Some sudden Fire or unruly Actions may prove detrimental to the Inhabitants of some place or places, which God prevent.—— The Actions of these times do shew themselves a little uncertain, Buſie matters appear. Somewhat of Importance seems now portended by the Stars. touching *Flanders*, *Brabant*, *Spain*, *Hungary*, *London*, &c ——

Great Winds in this Month and sharp weather, &c.

December

1680. December hath xxxi Days.

Last quarter, the 2 day, 37 minutes past 9 at night.  
 New Moon, the 11 day, 36 minutes past 1 morning.  
 First quarter, the 18 day, 37 minutes past 7 at night.  
 Full Moon, the 25 day, 25 minutes past 8 morning.

**S**Till untoward proceedings Northward,——  
A cold Month in good earnest if not abundance  
of Snow, and now there are notable *Configurations*  
of the *Stars*, viz. An Opposition of *Saturn* and  
*Venus*, two Oppositions of *Saturn* and *Mercury*,  
and an Opposition of the *Sun* and *Saturn*——in  
*Cancer* and *Capricorn*.——If the present Actions  
and Concerns of some Nations be serenely mana-  
ged now, it will be well.——A thwarting time,  
Turbulent Spirits are not idle. The rough Aspects  
of the Heavenly Bodies import difficulties in *National*  
Affairs; and Crosses, and Vexations attend  
some people——Many Piracies and Storms at  
Sea, losses some foreign Nations receive there.  
Strange Reports, many Lyes abroad, and scanda-  
lous Libels. News from the *West-Indies* not ac-  
ceptable to some people beyond the Seas concern'd  
there.——Inundations may be feared, or over-  
flowing of the Sea Banks *Northward* or *North East*,  
with extraordinary Floods. God blefs the *Low*  
Countries from damage thereby, and the *North* and  
*North-East* parts of *England*. Many various reports  
from *Scotland*, *Holland*, *Venice*, &c. ends the  
Year. *Laur Dea.*

# Astrological Judgments,

## For the Year, 1680.

By William Andzeus, Student in Astrology.

*Figura Caeli ad Ingressum Solis in ♊, seu Tropicum Hyemalem.*

Do here treat of the Year 1680, unto which we are now arrived. And shall (with Gods assistance) discourse now of the most material Positions and Configurations of  
Heaven

## Astrological Judgments

Heaven happening therein. Wherein, first of all, I will begin with the *Ingress* of the *Sun* into *Capricorn*. in *December* 1679; and take notice of the then *Position* of *Heaven*, and *Configurations* of the *Stars* attending the same; and afterwards proceed to the *Vernal* and other *Solar Ingresses*, *Eclipses* of this Year 1680; and all other *Cœlestial* Matters, worthy at this time of consideration: and from thence deduce some *Judgments* and *Observations* from the Principles of *Art*, (with as much circumspection as may be) according to my usual Method —

The last Year 1679. we hinted somewhat touching the then Removal of *Saturn* out of *Gemini* into *Cancer*; it was about the 23<sup>d</sup> day of *June* last past that he made his Entrance into that Sign, and here we find him, at the *Ingress* of the *Sun* into *Capricorn*, got into the fifth Degree thereof — If those Countries and Places under that *Constellation*, during his continuance therein, be free from disturbances, troubles, vexations, and all Distempers and Casualties of his Nature, it will be well — His Transit through *Gemini* hath been by some sober persons taken notice of, and his Influence during his continuance therein, hath been in some respect or other manifested, in all or most of those Countries and Cities under the said Sign, as might be sufficiently demonstrated — But we come unto the aforesaid *Ingress* of the *Sun* into *Capricorn*; at which time the Stars stand thus posited, viz. *Saturn* is in the Ascendant, in *Cancer* as aforesaid, Retrograde. *Jupiter* in the 11<sup>th</sup> House Retrograde, in the beginning of *Taurus*, but quickly after he appears Stationary, and then becomes Direct in Motion. The *Sun* is in the 7<sup>th</sup> House, in Trine of *Jupiter*. *Mars* and *Mercury* are in the 8<sup>th</sup> in *Capricorn*. *Venus* is in *Scorpio* in the 6<sup>th</sup>, and the *Moon* in *Leo* in the 4<sup>th</sup> House, in Square of *Venus* — All which duly considered, seems to intimate, That, notwithstanding all various Reports, the Grand Affairs of *Europe* at the beginning of this Year 1680, and during the Months of *January* and *February* of the same, will be pretty calmly carried on; and some sober and judicious persons will be diligent to cause a right understanding to be continued betwixt some Nations — — And the

the generality of people will be pretty moderate in their actions, notwithstanding the Contrivances and pernicious designs of some sturdy and unquiet Spirits, which may (perhaps) be labouring to advance matters of a cross and thwarting Nature —

*Mercury* is Lord of the Ascendant at the aforesaid *Ingress*, as if Mens minds would be various and inconstant, and not very well settled, full of Cunning and Deceit, which seems the more confirmed by the Position of *Cauda Draconis* in the 11<sup>th</sup> House, which signifies treacherous, deceitful, and perfidious actions to appear amongst Men: Besides, *Saturn* in the Ascendant Retrograde imports, That the Commonalty of some Regions will be in the month aforesaid of a rugged, peevish and contentious disposition, murmuring and repining at their Superiors most unworthily, though in the end to their own confusion. The truth is, the *Sun* is hastning at the *Ingress* to the Opposition of *Saturn*; which seems to import Difficulties between superiour and inferiour persons, clandestine practices, and that a *Saturnian* people will, if possible, endeavour to be unruly; and as *Saturn* is now Retrograde, & unfortunately posited, so he doth further (by his presence in the Ascendant) denote, Misfortunes and troubles unto many people in their Persons; and also several mischiefs, losses and vexations to attend the Commonalty of some Countries, unto which his present Influence hath relation—— Animosities also may appear amongst Men of Renown in the World, for *Saturn* is Lord of the 10<sup>th</sup> House, and the *Sun* is in the 7<sup>th</sup>.

Moreover, the present Position of the *Moon* is to be disliked. *Haly* saith, *Pag.* 378. when the *Moon* shall be in the 4<sup>th</sup> House (as now she is) *significat tristitias & anxietates multas*, that people will be sad and full of anxieties. And seeing the Lord of the Ascendant is in the 8<sup>th</sup> House, many people will dye in this Winter Quarter, especially those of the younger sort, and *Mercurial* Persons; and as *Mars* is now posited in that House, he doth import the death of Souldiers and Martial men in some Countries, and of people by Skirmishes, Conflicts, &c. and that some persons will be subject unto violent and sudden death; and *Venus* in the sixth

## *Astrological Judgments*

Houle, shews a sickly time unto many Women——

As unto the *Diseases* and *Sicknesses*, which will be most prevalent in the Months of *January* and *February* of this Year and Winter Quarter, they are signified by *Saturn*, *Mars*, and *Venus*; therefore at some time in the said months, Colds, Consumptions, Palsies, Agues, rotten Coughs, &c. will be very frequent; and also towards the beginning of the *Spring*, Diseases of a hot nature will appear, violent Feavers, the small Pox, Meazles, Surfers, Inflammations, if not some pestilential Distempers, whereof many People in some places will dye.

*Brandenburgh*, and some other places under *Capricorn*, may be in this Quarter concerned, and subject unto Martial Actions and Distempers; and so may some other places—— lying Northward, and Northeast from *England*—— And so I proceed to the *Ingress* of the *Sun* into *Aries* this Year, at which time the *Spring-Quarter* Astronomically begins——

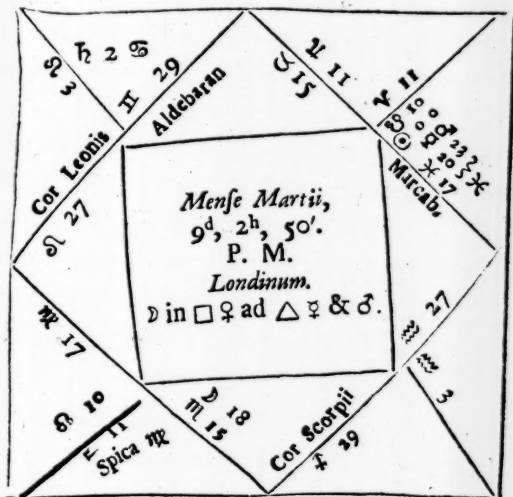

At the *Ingress* of the *Sun* into *Aries* this present year 1680 the Heavenly Bodies are curiously disposed, and very weighty and important Configurations attend the same; as if the World would be full of business in the *Spring* time of this Year, yea, even the *European* Part thereof,

We find in this *Revolution*, *Saturn* in the 11<sup>th</sup> House, *Jupiter* in the 10<sup>th</sup>, in the 11<sup>th</sup> degree of *Taurus*, *Mars* and *Mercury* in *Pisces* in the 8<sup>th</sup> almost in *Conjunction*; the *Sun* is also in the eight House in *Square* of *Saturn*; *Venus* is in the 6<sup>th</sup> in *Aquarius*: and the *Moon* is in the fourth in *Scorpio*, applying to the Trine of *Mercury* and *Mars*—— Thus the Heavens appear at the said *Ingress*, and quickly after the same *Mars* and *Mercury* enter *Aries*, and do then come to a *Square* of *Saturn*—— from hence we may probably conjecture in the general, that there will be many great turnings and windings in Humane Affairs, and that the publick businesses of some Nations will be managed and carried on very vigorously, and that considerable Actions will happen in the *Spring*-time of this Year, viz. in the Months of *March*, *April*, and *May* in those Countries, Cities, and places concerned now by the afore said Configurations and Position of the stars attending

For the year 1680.

*Figura Cœli ad Æquinoctium Vernum, seu Ingre-  
sum ☉ in ♈. 1680.*

attending this said present *Ingress* of the Sun into *Aries*—

Four of the Planets are in this *Vernal Figure* in watry Signs, namely, *Saturn*, *Mars*, *Mercury*, and the *Moon*, as if some Nations would be very much employed about Sea-Matters, in setting out of Fleets, and in strong Marine-Preparations; besides, as *Mars* and *Mercury* are now in Conjunction, so there will be many rumours and false reports spread abroad; also Piracies at Sea, and much boisterous Weather, and storms there, whereby the Merchants of some

### *Astrological Judgments*

Countries will receive considerable Losses ; for this Conjunction doth import much detriment, decay of Trading, perplexity, and misfortune unto those persons signified by *Mercury* ; for *Mercury* is not only much afflicted by the presence of *Mars*, but he is also in his Fall and Detriment —

It is very observable, that the *Sun* no sooner enters *Aries*, but he presently comes to the *Quadrature* of *Saturn* : The *Sun* is Lord of the *Vernal* Ascendant, and *Saturn* is Lord of the seventh and sixth Houses in the Scheme, and this seems to be of some unquiet signification, for it is no amicable Aspect, but in some respect of a quite contrary Nature ; Difficulties do therefore seem signified thereby to appear during this *Revolution* in some Countries and Cities ; and some unhappy Differences may arise in the World, betwixt Nation and Nation, or People formerly in League and Amity ; and one Country may be ready to contend with another, whereby the peace of some places may be disturbed ; and as *Saturn* is in the Eleventh House, which House signifieth Friends and Acquaintance, Hope, Things desired, Companions, the Counsel of Friends, their falseness or fidelity, &c. so likewise this aforesaid *Quadrature* of the *Sun* and *Him* doth seem to import no great unity amongst Friends and Acquaintance, but that people will be ready to strive and quarrel one with another, and that friends will prove false and unfaithful, and the hopes and desires of many will be frustrated — and contentions and rebellious Spirits shall suffer according to their deserts.

I do proceed, and say, That forasmuch as *Mars* and *Mercury* do so quickly after this *Ingress* of the *Sun* into *Aries*, remove out of *Pisces* into that Sign, and do then presently proceed therein unto the *Quadrature* of *Saturn* in *Cancer*, as aforesaid — it doth import, rash and hasty actions both at Sea and Land, and that there will be rumours of War, and Matters of a Martial Nature, Battels, or Slaughter of people, Commotions, much robbing and thieving, and sundry enormities of the nature of those Planets, in those Countries and places concerned by the said Constellations of Heaven,

For the year 1680.

ven, wherein the beforementioned *Quadratures* happen—  
The Cities of *Constantinople* in *Greece*, *Tunis*, and *Algier* in *Barbary*, and other places under the *Turks* Dominions, will be highly concerned in one kind or other, to their great loss, disturbance and damage, their Merchants ships, their Pira-  
tical ships, their Mariners, Souldiers, &c. will either be la-  
sfully beaten in sea-fights, or extremely shipwracked by  
storms and bad weather, and will not return to the benefit  
and profit of their Undertakers and Owners; all which seems  
the more strongly confirmed by a malevolent Conjunction of  
*Saturn* and *Mars* in *Cancer*, in the *Summer-Quarter* of this  
Year, of which more hereafter.

We do observe, that not only the beforementioned places  
in the *Turks* Dominion seem hinted at by the Celestial Bo-  
dies at this *Revolution* and *Configurations* of the wandring  
stars this very year, but also all or most of those Countries  
and places under the sign *Cancer* aforesaid, and some under  
*Pisces* and *Aries* too, will in some respect or other be like-  
wise concerned. The State of *Venice*, their Armies by land,  
and Navies by sea. The City of *Milane* in *Italy*, and its  
Confines and Territories. The Cities of *Wittembergh*, and  
*Magdeburgh*, *Scotland*, *Holland*, *Zealand*, yea, *Amsterdam* it  
self may be considerably sensible of the present Influence  
and Effects of *Saturn* in *Cancer*—

Here is the Benevolent Planet *Jupiter* in *Taurus*, in the  
10<sup>th</sup> House, and this hath good signification unto those  
Countries and Places, men and things concerned by that  
sign and House of Heaven. The Kingdom of *Ireland*, they say,  
is under that *Constellation*, and we have some reason to be-  
lieve it: *Ergo*, it may be hoped that that Kingdome will be  
in a good Condition, and the people thereof in a thriving  
posture, loyal to their *Sovereign*, and cheerful and well na-  
tured and disposed. The *Polish* Affairs in this *Quarter* may  
also prove successful, those people seem also favoured by  
the Heavens at this time— *Germany*, *France*, *Sweden*,  
*Denmark*, *England*, &c. are under *Aries*, as *Astrologers* af-  
firm, and *Portugal* under *Pisces*. *Saturn* is in Square unto *A-*  
*ries*, and sundry *Configurations* at this *Revolution* happen in

## Astrological Judgments

the same, of some considerable signification as aforesaid—— Besides, a very considerable *Eclipse* of the *Sun*, though scarce visible in our *Horizon*—— which we shall hereafter describe.

As unto the *Weather* in this *Spring-Quarter*, it will prove fickle and unconstant for the most part, especially in *March*, for four Planets in moist signs, as aforesaid, at this present *Vernal Ingress*, do declare that there will be very often in the *Spring-time* of this year, wet and unseasonable *Weather*. The last *Spring*, and whole year (though dubious at first) proved very comfortable unto the Farmers employment (as I told you it would) generally throughout most parts of *England*, as to his Corn, &c. We wish the like this year, but do fear otherwise. There will be now and then in this year terrible Claps of Thunder and Lightning in some places, with extraordinary hasty storms of Hail and Rain, causing great floods, prejudicial to the places where they happen.

The diseases and sicknesses of this *Spring-Quarter* are designed to be much of the Nature of those mentioned before by me, in the *Winter-Quarter* of this Year. Here are *Mars* and *Mercury* in the Eighth House now also, as they were before at the aforesaid *Ingress* of the *Sun* into *Capricorn*, and *Saturn* is Lord of the 6<sup>th</sup> House in this *Vernal Scheme*. God keep us from sudden Death, and from all violent and pestilential Distempers now and ever—— But sith there is an *Eclipse* of the *Sun* in this *Quarter*, I will now come (before I proceed to the *Ingress* of the *Sun* into *Cancer*) to give you

### An Account of the *Eclipses*, which happen in this Year, 1680.

THE *Eclipses* of this Year are only two, and they both of the *Sun*, and are Central; the one being before the *Suns Apogæon*, and the other after it; insomuch that there can be no *Eclipse* of the *Moon* this Year. The first of these *Eclipses* is on the twentieth day of *March*, about ten of the  
Clock.

For the year 1680.

Clock in the Morning; it happens near the South Node of the Moon, and will be very great and total, and visible unto such as inhabit the South-parts of *America*, the Cape of *S<sup>t</sup> Vincent*, the *Holy Island*, &c. I conceive it will scarcely be seen of us, yet peradventure we may see some of it in these Islands—— It happens in or about the Eleventh Degree of *Aries*, and therefore not to be slighted, in regard its Effects may be of some Consequence unto those Countries and places of *Europe* under that Constellation, &c.——

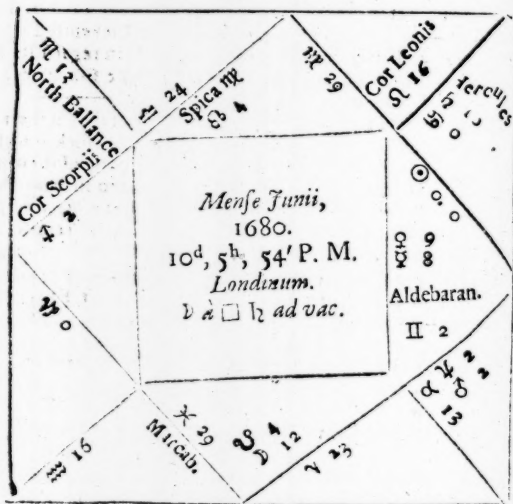

The second of these Eclipses of the Sun, falls on the 12<sup>th</sup> day of *September*, at or about our Eight of the clock at night, and will appear a very great Eclipse in those parts of the world where it is designed to be visible, that is, unto such as shall sail or navigate near unto *Saint Peters Port*, the *Island of Paxaro*, &c. but it can no ways be seen of us, in regard the Sun and Moon are then both under the Earth or our Horizon before this said Eclipse begins. It falls in the very beginning of the sign *Libra*, and may have very eminent Effects and Portents—— And so I shall pass on to the Summer Quarter of this Year, which, according unto Astronomical Account, begins at such time as the Sun enters the first point of *Cancer*——

True it is, *Haly*, and *Guido Bonatus*, two famous *Astrologers*, are of this opinion, viz. That when at the Suns Ingress into *Aries*, the sign ascending shall be a fixed sign, (as it is this Year, for *Leo* then ascends) that Revolution in it self comprehendeth all the four Quarters of that Year: but the Doctrine of *Ptolemy* is more to be embraced, (according to my opinion) which directeth us to consider the four Quarterly Ingresses of the Sun, and *Ptolemy* proceeds to give the reason thereof in these words, *Nam ipsa quidem universales constitutiones temporum & mores Soli parit, unde & penitus imperiti Mathematicum praeosant futura*: for these general Constitutions and Manners of them are caused by the Sun, whence even many, unskilful in *Ast.* do come to the knowledge of future Events—— I do now wholly follow the Method of *Ptolemy*, as being the most rational——

cum Æstivum.*

What is most observable at this *Ingresso* of the *Sun* into *Cancer* is, the position of four Planets in *Gemini*, in the seventh House, viz. *Jupiter*, *Mars*, *Venus*, and *Mercury*, as if this Summer of 1680. would be of a busy Nature, both in regard of Counsel and Action—— for so many Planets in the House of *Mercury*, and he amongst the rest, intimates, that many Debates and Consultations will be on foot therein, for the carrying on of some important Matters and Designs in the World, the more in regard that *Jupiter* and *Mars* are in Conjunction just at the said *Ingress* in the said *Constellati*,

For the year 1680.

on, as if much variety of Action would follow — There will be many Reports from *Flanders, Brabant, and the Spanish Neiberlands* in this *Summer-Quarter*, touching some matters of consequence there —

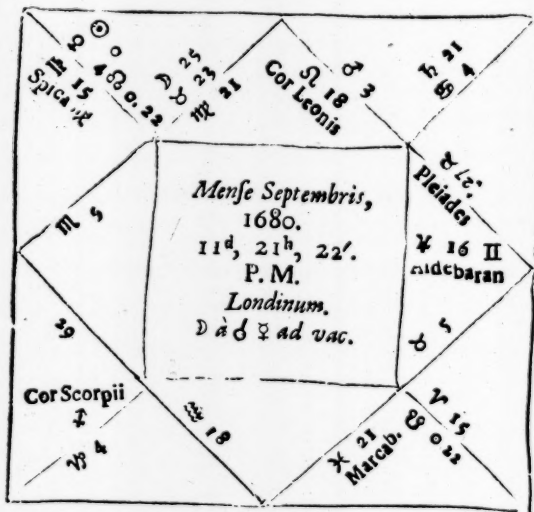

Again, so many Planets in the seventh House of Heaven, being termed by Astrologers the House of Conception, War, and Wrangling, may import that some places beyond the Seas, under the aforesaid Sign, viz. *Gemini*, will be now and then liable unto disasters and difficulties, and if they be free from Wars and Commotions in this said *Summer-Quarter*, it will be well. Besides, many people will be given unto Law-suits and Controversies, and many Duels (perhaps) will be fought in some places, and some noquiet spirits may be active, and some people inclined unto strife and variance, and crafty practices, &c. *Erunt inter homines deceptiones, & falsitates multae, & accident iniuriosiones multae, & prada-tiones* — As the said *Constellation* is of the *Airy Trigon*, so the Effects of these Planets therein will operate much in the Air; From whence, variety of Weather may be expected, and sometimes very tempestuous, &c. God Almighty protect the City of London from all Calamities by Fire, Sickness, and unruly Actions in this *Summer* and evermore; we hope 'twill be a time of good Trading there, and many Merchants Ships will safely arrive, to the great comfort and content of the Owners.

We are to take notice, that in this Quarter there is a notable *Conjunction* of *Saturn* and *Mars* in *Cancer*, viz. on the 20<sup>th</sup> day of *August*, which *Conjunction* seems to have very material significations. It happens in a watery Sign, and therefore its Influence will be manifested at Sea, and upon the Waters amongst Fishermen and Seamen, &c. — Those places under that *Constellation* heretofore, before mentioned, may be sensible of its portents both at Sea and Land. It doth seem to import, That some people will be passive either by War, Sickness, Depredation of Enemies, Sea-fights, &c. Many hasty showers of Rain at unreasonable times, or too much moisture: Inundations or Overflowing of the Sea-Banks Northward or North-east, Fleets at sea much damaged

# Astrological Judgments

ged by Storms or contrary weather : others battered by the Enemy, strange shipwracks, &c. if not some unruly passages Northward—— And so I proceed to the *Autumnal Quarter* of this Year, being the last to be considered——

*Figura Cœli ad Ingressum Solis in ♎, & Equinoctium Autumnale.*

This Position of Heaven at the *Ingress* of the Sun into *Libra*, seems much more serene and favourable than the other before treated of ; and doth seem to declare a greater probability of settlement and tranquillity in Mundane Affairs than was by the former Position signified or declared——

The

For the Year 1680.

The Angles of the Figure are fixed, *Mars* is Lord of the Ascendant in the Ninth House, and *Saturn* is likewise therein. *Jupiter* is in the Seventh, and *Venus*, *Mercury*, the *Moon*, and the Head of the *Dragon* are in the 11<sup>th</sup> House; and so likewise is the *Sun*—— so that much of this *Autumnal* Quarter will be spent about matters and things of a very amicable importance unto Mankind, and that many Consultations will be on foot of a propitious Nature. However, *Saturn* and *Mars* in the Ninth, seem to intimate detriment and difficulties unto such as shall take long Journeys or Voyages in this Quarter, and so many Planets in the eleventh signifieth, that many Treaties will be on foot in some parts of the World, and that people will be pretty friendly disposed, and in a pretty good temper; and also that the grand Affairs of the World in general will be managed and carried on in a calmer manner than in the other Quarters past—— If that the Influence of the beforementioned *Conjunction* of *Saturn* and *Mars* do not appear herein, which may be somewhat feared—— Howsoever, here seems signified more of Consultation than Action this Quarter. God Almighty bless this *English Nation*, and make us thankful for the great Blessings we do enjoy under a most Gracious King. whom God preserve.

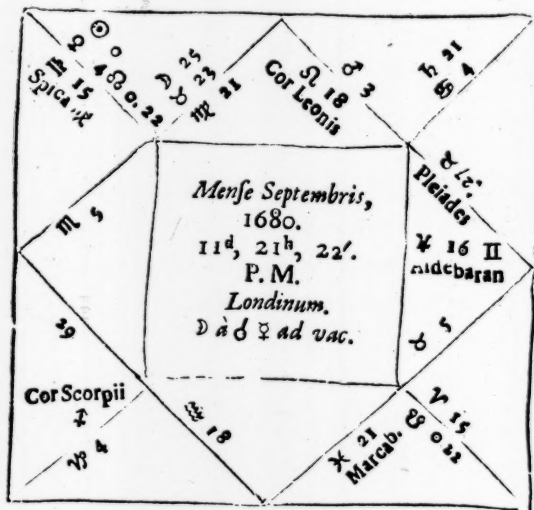

—————*Te Deum laudamus.*
